SUMMARY

Full Stack Developer experienced in React.js, Next.js, TypeScript, Node.js, NestJS, REST APIs, Docker, and CI/CD pipelines. Delivered production-ready web applications for healthcare and NGO sector clients. Mentored 200+ students in modern full stack web development.

EDUCATION

Bachelor of Computer Applications in Information Technology

Jun 2024 – Jun 2027

GLA University, Mathura | CGPA: 7.4

- Won 2+ external hackathon awards as an active participant in coding competitions.
- Completed production-grade projects using React, Node.js, Next.js, TypeScript, and Supabase.

EXPERIENCE

Freelance Full Stack Developer

Jan 2025 – Present

Independent Clients – Healthcare and NGO Sector

- Delivered 2 production websites, managing the complete Software Development Life Cycle from design to deployment on Vercel using GitHub Actions.
- Integrated Razorpay payment gateway enabling secure online donation transactions with a 100% uptime record.
- Improved application performance by 60% using Server-Side Rendering and lazy loading techniques.
- Configured CI/CD pipelines using GitHub Actions and Docker, enabling reliable zero-downtime deployments.

Coding Mentor

2024 – Present

MERNIFIED Community

- Mentored 200+ students in full stack development covering React.js, Node.js, MongoDB, and REST API design through live sessions.

PROJECTS

NeonScript – AI-Powered Browser IDE | [neonscript-basic.vercel.app](#) | Next.js, TypeScript, Jan 2025 – Present Node.js, Docker, Monaco Editor

- Built a browser-based AI-powered IDE that generates complete project structures using multi-model LLM routing via OpenRouter, reducing manual scaffolding time by 70%.
- Integrated WebContainers and Convex DB enabling live preview and real-time browser-based file updates across concurrent user sessions.
- Designed GitHub import and export functionality for full project management without any local setup, adopted by 30+ early testers.

NGO Donation Platform | [vrindavanserinity.vercel.app](#) | Next.js, TypeScript, PostgreSQL, Dec 2024 – Jan 2025 Supabase, Razorpay

- Built a full-stack donation platform processing 3 category-wise payment flows (Food, Shelter, Medical) via Razorpay API with a 100% transaction success rate.
- Implemented Supabase authentication with Row-Level Security, protecting 100% of user data across all donation records.
- Achieved sub-2-second load times through Server-Side Rendering and lazy loading.

TECHNICAL SKILLS

Frontend:	TypeScript, JavaScript, React.js, Next.js, Tailwind CSS
Backend:	Node.js, NestJS, Express.js, REST APIs, JWT Authentication
Database:	MongoDB, PostgreSQL, Supabase, Row-Level Security, Prisma ORM
DevOps & Tools:	Docker, Nginx, Git, GitHub Actions, CI/CD, Vercel, Linux
AI & Automation:	OpenRouter, LLM API Integration, WebContainers

ADDITIONAL INFORMATION

Achievements: Won 2+ hackathon awards in Full Stack and AI categories; solved 100+ problems on LeetCode, HackerRank, and CodeChef

Languages: English, Hindi
